

# Setting up Merchant account?

Chase Paymentech have assigned a sales team to work directly with our clients including a toll free number **800-350-7780** to assist you in opening a new merchant account. Due to design of the credit card processing software **Quick Pay**, it is very important to setup your account correctly in order for it to work with BNC developed products such as Swipe-N-Clean, Entry Wizard, EW 2.0 & EW3.0 and SATB systems. Also any previous customer who happened to have switched to Bank of America/FDMS platform, we are strongly suggesting you to open new Merchant Account in order to prevent any credit card related issues such as not getting paid for all the transactions or multiple billings etc.

**You may contact Angela @ 832-367-1372 for further details.**
